

Introduction

This document provides eligible investments and is considered to be the standard by which this investment area is to be implemented.

Funded participants shall adhere to all local, state, and federal rules and regulations.

Questions concerning these guidelines should be directed to the Governor's Office of Agricultural Policy at (502) 564-4627. Applications to administer CAIP must be directed through the local County Agricultural Development Council(s).

A. Forage, Pasture and Grain

Only certified, PVP or proprietary forage varieties will be eligible for cost share. In addition, these varieties should have documented performance in university trials such as those conducted by the UK College of Agriculture. Other varieties will be considered with documentation of performance upon written request to UK through the County Extension Agent for Agriculture and Natural Resources.

Prerequisites:

- **A soil test**, taken within the last 12 months, shall be conducted prior to lime or seed application.
- Only Certified or Plant Variety Protected or Proprietary varieties will be acceptable (see list of approved varieties attached).
- The variety must be specified on the receipt.
- **Clover:** If soil pH is below 5.0, then clover seeding should be delayed by 6 months after lime application. **Alfalfa:** If soil pH is below 5.5, then seeding must be delayed by one year after limestone application.
- Cost-share is on seed and limestone only, based on receipts from vendors.

Cost-share Items:

1. **Forage/Pasture Seed:** Only varieties specified in the Seed List (Appendix A) are eligible for cost-share.
 - a. **Clover – red and white**
 - b. **Alfalfa**
 - c. **Summer Perennial Forages**
 - i. Bermuda grass
 - ii. Big Bluestem
 - iii. Eastern Gamma Grass
 - iv. Caucasian Bluestem
 - d. **Cool Season Forages**
 - i. Endophyte-free Fescue
 - ii. Kentucky Bluegrass

- iii. Novel Endophyte Fescue
 - iv. Orchardgrass
 - v. Timothy
 - vi. Festulolium
- e. Other Crops for FORAGE and GRAZING purposes only**
- i. Corn (less than 10 acres)
 - ii. Wheat
 - iii. Rye
 - iv. Ryegrass
 - v. Oats
 - vi. Soybean (forage beans only)
 - vii. Brassicas (i.e. turnips)
2. **Limestone** based on a soil test taken within the past 12 months and prior to lime application for forage, pasture or grain production.
 3. **Inoculants**
 4. **Specialized spraying equipment** (not self-propelled)
 5. **Animal waste handling and distribution equipment** (excluding motorized vehicles)

B. Filter Fabric Pads for Heavy Use Areas

Costs associated with development of filter fabric pads for improved surface drainage under bales and in heavy use areas including contracted site preparation (excludes motorized vehicles)

C. Field Drainage

Costs necessary for the installation of drainage systems for improved soil drainage (excludes motorized vehicles)

- Subsurface Drainage – Tiling
- Surface Drainage – Grassed Waterway
 - Prevention of erosion/run-off

D. Seeding: Custom Services and Rental of Equipment

Prerequisites:

- For rental of seeding equipment, reimbursement will not exceed 50% of the rental cost of said equipment.
- Only labor provided through a custom seeding service is eligible for reimbursement, labor for using rental equipment is not reimbursable.

Rental of a no-till drill or pasture renovator is eligible for reimbursement on a cost-share basis.

APPENDIX A: Seed Varieties

Visit http://agpolicy.ky.gov/funds/documents/forage_seedlist.pdf for the most up-to-date list of seed varieties eligible for use with this program.
