STANDARD OPERATING PROCEDURES

Adopted 5/20/2016, Last Revised 11/16/2018

A Guide for County Cooperative Extension Agents and County Agricultural Development Councils

A partnership between the Governor’s Office of Agricultural Policy, the University of Kentucky Cooperative Extension Service and the Kentucky Agricultural Development Board
The Governor’s Office of Agricultural Policy provides grants, incentives and low interest loans to help farmers and agribusinesses innovate and grow.

KADB Mission Statement

The mission of the board is to invest Kentucky Agricultural Development Funds in innovative proposals that increase net farm income and affect tobacco farmers, tobacco-impacted communities and agriculture across the state by stimulating markets for Kentucky agricultural products. This includes finding new ways to add value to Kentucky agricultural products and exploring new opportunities that will benefit Kentucky farms now and in the future.

KADF Projects

Projects are expected to positively affect the economic status of farmers and the targeted agricultural community. Successful applicants should be able to demonstrate the following:

- Economic/commercial viability and feasibility of the proposed project: project will be self-sustaining within a reasonable period of time, project will have a significant impact on farm income for multiple producers, project will have high potential for growth, and will have potential to include more farmers in the future.

County Agricultural Investment Program (CAIP)

CAIP offers 11 investment areas that give Kentucky agricultural producers the ability to increase net farm income, add value to their products, and diversify their operations. CAIP benefits and enhances agriculture across the state by stimulating markets for Kentucky agricultural products.

Deceased Farm Animal Removal Program (DAR)

DAR serves as a measure to facilitate the coordination of environmentally sound and cost-effective disposal of deceased livestock for producers.

Next Generation Farmer Program (NextGen)

NextGen was developed to address the growing need for a specialized program to benefit producers with three to seven years of agricultural operation engagement.

Shared-Use Equipment Program

The Shared-Use Equipment Program assists broad-based community organizations on the purchase of farm equipment. The equipment purchased is made available for producer use in a specific county on a leased basis.

Youth Agricultural Incentives Program (YAIP / Youth)

YAIP provides support to youth actively engaged in agricultural education activities.

1. Overview of County
   
   a. Agricultural statistics, trends, & projections
      - Traditional agricultural production
      - Non-traditional agricultural production
      - New & emerging agricultural production
      - Tobacco dependency
   
   b. Demographic Data
      - Social data
      - Economic data

   A county council needs to review and update available statistical data on farming in that county. Most information can be collected from the agricultural census, from annual statistical reports from the Kentucky Agricultural Statistics Service, and other.

2. Assessments of the County
   
   a. Strengths
   b. Weaknesses
   c. Opportunities
   d. Challenges

   Following the collection of updated information, councils need to reevaluate strengths and weaknesses that exist in the county. A revised list of opportunities and challenges will help the county council determine a set of updated priorities for where and how funds will be invested.

3. County Council Objectives
   
   a. Mission/Vision Statement
   b. Short term goals
   c. Long term goals
   d. Tactics for leveraging funds
      - Regional partnerships
      - State Agricultural Development Board resources
      - Other local/state/federal resources

   County councils need to update the current mission statement or a statement of vision for the council and agricultural community. County councils need to update short term and long term goals for investing county funds. Please also identify specific means to reach those goals. Counties need to also consider regional projects and how they could leverage resources from other local, state, and federal agencies.

4. Evaluation & Review
   
   a. How are proposals evaluated and does this process need modified?
   b. How is success and failure measured?
   c. How will the county comprehensive plan be revised?

   This should include information on how councils handle requests for county funds. It could include criteria for evaluating success and a process for revision in the county plans.
