

Governor's Office of Agricultural Policy

Annual Report

Fiscal Year 2012

July 1, 2011—June 30, 2012

Kentucky Agricultural Development Board
Kentucky Agricultural Finance Corporation

GOVERNOR'S MESSAGE

Agriculture is the heart and soul of our rural communities across the Commonwealth...and vital to future growth and development throughout Kentucky.

Steven L. Beshear
Governor

It has been slightly more than a decade since the Kentucky Agricultural Development Fund's programs were implemented and just over five years since I took office. During this time, we have continued looking at the successes of Kentucky agriculture and what the future may hold for the Kentucky Agricultural Development Fund (KADF).

Many factors played a role in growing Kentucky's agriculture economy over the last 10 years, and the KADF investments have been and will continue to be crucial to that growth. Investments made, not only in on-farm improvements through the county programs, but also in statewide resource projects like Kentucky Proud, the Kentucky Beef Network, the Kentucky Dairy Development Council, the Kentucky Horticulture Council and others, have proudly led Kentucky agriculture into a new farm economy and a brighter future.

During the 2012 fiscal year, we have focused on partnerships, which are very important in agriculture. One very special partnership between GOAP, the Kentucky Cattlemen's Association, Kentucky Pork Producers Association and the Kentucky Poultry Federation has allowed Kentucky Agricultural Development Funds to be leveraged for the promotion of agriculture throughout the Commonwealth. This partnership has allowed us to take advantage of a special program through the Kentucky Broadcasters Association (KBA) and air television and radio commercials that promote "Kentucky Farm Families: Feeding Kentucky; Feeding the World."

As generations move farther from the farm, it is increasingly important to instill an appreciation of the food and fiber system in consumers. Even with our efforts through the KBA project and efforts by other organizations, it still comes down to each farm family sharing their stories with friends, neighbors and even strangers, because who better to tell the story of agriculture than the farmers. Kentucky has a proud heritage and a promising future, which provides the foundation for a valuable story that we can share with others.

Agriculture is the heart and soul of our rural communities across the Commonwealth. It is a cherished part of our past, contributes to our current economy and is vital to future growth and development throughout Kentucky.

Kentucky's official marketing program, Kentucky Proud, is administered by the Kentucky Department of Agriculture with support from the Kentucky Agricultural Development Fund (KADF).

More than \$13 million from the KADF has been invested into the program.

INVESTMENTS & INITIATIVES

Kentucky's historic investment in agricultural diversification created an unprecedented opportunity for Kentucky farmers to access funds to diversify their operations and expand farm-based enterprises.

Agricultural Economic Development

For nearly a year, the Kentucky Agricultural Development Board (KADB), the Kentucky Agricultural Finance Corporation (KAFC), staff of the Governor's Office of Agricultural Policy (GOAP) and many others participated in activities related to a challenge issued by Governor Beshear.

He challenged all to take a fresh look at the Kentucky Agricultural Development Fund (KADF) for opportunities that would lead to greater profitability for our farmers.

The following are the top five priorities that the KADB developed and used as a gauge in 2012 for funding considerations, program development and policy initiatives:

- 1) capital access for economic development;
- 2) promotion of the KADF and agriculture, in general;
- 3) value-added processing;
- 4) livestock marketing; and
- 5) on-farm investments.

Spotlight on Priority #2:

A Partnership to Promote Kentucky Agriculture

Food. Most of us think about food several times a day, even planning when, where and what we will eat. But, do we think about how it gets to our tables and by whom? The simple answer - Kentucky farm families: feeding Kentucky, feeding the world.

In 2012, GOAP partnered with the Kentucky Broadcasters Association's Public Education Partnership (PEP) program to increase the awareness of Kentucky agriculture and highlight the integral role farm families play across the Commonwealth. In each spot, you will hear the tag line, "Kentucky farm families: feeding Kentucky, feeding the world."

This initiative also has allowed GOAP to have a very special partnership for the PEP program, leveraging Kentucky Agricultural Development Funds with three leading livestock commodity groups: the Kentucky Cattlemen's Association, Kentucky Pork Producers and the Kentucky Poultry Federation.

Farm families from these commodity groups were featured in commercials and radio spots along with other agricultural sectors throughout the year.

See Appendix C for photos of the farm families featured in the KBA radio and television commercials.

On-Farm Investments

While capital access, value-added processing, promotion and marketing are important to the agriculture economy, none of these are necessary without production agriculture. The KADB recognized this importance and developed, in conjunction with state and local stakeholders, cost-share incentive programs that would provide producers an opportunity to try new farm enterprises or enhance their existing enterprises.

County Agricultural Investment Program

The County Agricultural Investment Program (CAIP) provides farmers with incentives to allow them to improve and diversify their current production practices.

CAIP covers a wide variety of agricultural enterprises, including commercial production of aquaculture; bees and honey; equine; forage; fruit; livestock; mushrooms; ornamental horticulture; poultry; rabbits; timber; and vegetables, as well as agritourism business development; commercial kitchen construction or conversion; energy efficiency/production; and on-farm water enhancement.

In fiscal year 2012, 78 counties made CAIP available to their farm families with more than \$16.2 million invested.

See Appendix C for specific counties.

Shared-use initiative: This initiative made available enough state funds that when combined with the county's annual allotment could total up to \$15,000.

The funds could be used to implement the current shared-use equipment program within the county or in cooperation with neighboring counties.

The following counties participated: Bell, Boyd, Knott, McCreary, Perry.

See Appendix B for equipment specifics.

Shared-Use

The Shared-Use Equipment Program was designed to impact a high number of producers who cannot justify ownership expenses associated with certain equipment by helping them access technology necessary to improve their operations in an economical manner.

During fiscal year 2012, 17 counties invested \$303,706 into shared-use equipment.

See Appendix B for specific counties.

Energizing Kentucky Agriculture

With the price of fuel and utility costs continually escalating, more farmers are seeking alternate ways to save energy and money. There are many energy efficient investments that can make farming operations more profitable by using less energy. By controlling energy costs, our farmers can save significant revenue and can reinvest these resources in their families and operations.

Thanks to funding provided through the American Recovery & Reinvestment Act (ARRA), the On-Farm Energy Efficiency and Production incentives, farmers have been able to increase energy efficiency in their operations, allowing them to become more sustainable and profitable.

Since the program began in 2009, 164 grants were awarded totaling more than \$1.3 million. Those investments have saved nearly \$2 million in annual energy costs and 243 billion BTUs.

Recipients of the ARRA energy incentives received 25% reimbursement of the actual cost of a federally qualified energy savings or production project up to \$10,000. These grants have provided enormous benefit to Kentucky farm families and positioned Kentucky agriculture as a leader in on-farm energy efficiency.

Another component of the ARRA on-farm energy program involved projects focused on cooperative efforts among a variety of entities, including farmers, higher education groups, associations and the private sector. The Multi-County Energy Initiative, as it was called, emphasized a regional approach to advancing renewable energy production and energy efficiency on the farm.

Continued Investment in On-Farm Energy

Federal funding for this program has expired, but its legacy lives on in the KADF On-Farm Energy Efficiency & Production program. The KADB was so impressed with the results of the ARRA supported program that it modeled its own program after it. The KADB's initial investment for its 2012 On-Farm Energy Efficiency & Production program was \$2 million from the KADF.

As of June 30, 2012, 81 applications, totaling \$696,288, were approved for KADF energy funds. The 2012 program will wrap up its funding in February 2013.

The benefits of both of these programs will be recognized for generations to come. For more information, visit <http://ag-energy.ky.gov/>.

Farmers' Markets: Investments in Our Communities

Counties with KADF Supported Farmers' Markets

Over the last decade, interest in local foods and awareness of the impact that buying local has on a community's economy has increased dramatically. As a result, interest in community-based farmers' markets has risen for both consumers and farmers alike. The farmers' market provides a conduit for farmers and consumers to build relationships, including an understanding of farming practices and the consumer's needs and values.

According to the Kentucky Department of Agriculture, there were 147 farmers' markets in the Commonwealth in 2012. As of June 30, 2012, the KADF had supported 54 farmers' markets in 52 counties to the tune of \$2.6 million (\$1.5 million county and \$1.1 million state).

The KADB continued its support of the local foods movement through its 2011 Farmers' Market Infrastructure Competitive Awards Program, which provides an opportunity for local farmers' markets to access state funds for the construction of new permanent facilities for their markets. Up to \$250,000 in state funds was available for this program with a maximum of \$25,000 that any one applicant may receive in state funds.

Two markets were awarded a total of \$38,500 in state funds and \$5,000 in county funds for the 2011 program. As of June 30, 2012 seven applications had been submitted for funding through the 2012 program.

Access to Capital

KAFC offers an annual interest rate of two percent (2% a.p.r.) in its six participation loans, allowing participating lenders to charge a 0.75% servicing fee. Direct loans are available through two programs and are provided at Wall Street Journal prime.

Loan Programs

KAFC participates with lenders to provide financing to producers making capital expenditures for agricultural projects through the Agricultural Infrastructure Loan Program (AILP). Eligible projects include permanent farm structures with attached equipment that improves the profitability of farming operations.

The **Agricultural Processing Loan Program (APLP)** is designed to provide loan opportunities to companies and individuals in Kentucky interested in adding value to Kentucky grown agricultural commodities through further process. KAFC will provide or participate in loans that may cover construction of a new facility and renovation/expansion of an existing facility.

The **Beginning Farmer Loan Program (BFLP)** is designed to assist individuals who have some farming experience who desire to develop, expand or buy into a farming operation. KAFC will participate in loans to purchase livestock, equipment, agriculture facilities, to secure permanent working capital, purchase real estate or invest in a partnership or LLC.

KAFC will provide or participate in loans to entities with operations in Kentucky that are expanding their contracting opportunities

with Kentucky farmers. The **Coordinated Value-added Assistance Loan Program (CVALP)** may provide or participate in loans for renovation/expansion of existing facilities, acquisition of equipment and permanent working capital to facilitate expansion.

The **Diversification through Entrepreneurship in Agribusiness Loan Program (DEAL)** provides financing to beginning agri-entrepreneurs who are attempting to diversify their farming operations through non-traditional agricultural production or services. DEAL may provide financing for equipment, facilities, working capital and real estate with a participating lender.

The **Large/Food Animal Veterinary Loan Program (VET)** is designed to assist individuals licensed to practice veterinary medicine in Kentucky who desire to construct, expand, equip or buy into a practice serving large animal producers, as well as other smaller food animals.

As of June 30, 2012, KAFC had approved a cumulative total of 397 loans for more than \$47 million and accumulated over \$4 million in interest. KAFC also continues to service 13 KADB zero interest loans, totaling \$2,794,729.

See Appendix A for balance sheet and cash flow statement.

Total investments by program, FY2012:

AILP, 21	\$1,557,025 (20%)
APLP, 5	\$3,604,939 (47%)
BFLP, 16	\$2,361,739 (31%)
DEAL, 1	\$ 100,000 (1%)
VET, 1	\$ 100,000 (1%)

See Appendix C for specific loans.

Local Foods Initiatives

"The average meal in the United States travels 1,500 miles from the farm to the dinner table. By growing gardens in our backyards across Kentucky or buying locally grown produce, families can eliminate wasteful burning of fossil fuels and have access to fresher, healthier produce."

– First Lady Jane Beshear

The Governor's Office of Agricultural Policy (GOAP) has been working closely with First Lady Jane Beshear on her local foods initiatives, which includes the Governor's Garden program that is now housed at GOAP.

The Governor's Garden program began in 2009, inspired by First Lady Michelle Obama's garden at the White House. The First Lady partnered with several government, education and agricultural organizations to launch Kentucky's first Governor's Garden on the grounds of Berry Hill Mansion in Frankfort.

Since that time the program has grown to six Governor's Garden sites and has inspired numerous other garden sites in communities and schools across the Commonwealth. The majority of the produce harvested from each official Governor's Garden site is donated to

local soup kitchens and food pantries or prepared at onsite kitchens.

To increase awareness about the benefits of locally grown food and provide more opportunities for consumers to access information, the First Lady approached the University of Kentucky's College of Agriculture about developing a one-stop, online location for Kentuckians to find local food resources in their communities.

The Kentucky and Local Foods Resources webpage, <http://www2.ca.uky.edu/foods>, provides links to national, state and local resources available, as well as resources available through the UK College of Agriculture.

2012 Garden Locations: Berry Hill Mansion, Frankfort; Governor's Mansion, Frankfort; Kentucky Exposition Center, Louisville; Kentucky Horse Park, Lexington; Kentucky FFA Training Center, Hardinsburg; and Locust Trace Agri-Science Farm & School, Lexington

APPENDIX B: KADF Investments FY 2012

Applications approved between July 1, 2011 and June 30, 2012

Nearly \$22 million was invested in state, regional and local projects and programs between July 1, 2011 and June 30, 2012.

State/Regional

Agribusiness Technical Assistance

The Kentucky Center for Agriculture and Rural Development (KCARD) was approved for \$600,000 in state funds to continue providing business support services and technical assistance to rural agribusinesses across Kentucky through 2013.

Biofuel Pellet Mill Study

The Bracken County Agricultural Advancement Council was approved for \$14,500 in state and \$21,000 in county funds for a feasibility study to determine the viability of constructing and operating a biofuel pellet mill in the Bracken County Industrial Park.

County contributions to the project are as follows: Bath - \$1,000; Bracken - \$15,000; Lewis - \$1,000; Mason - \$2,000; Pendleton - \$1,000 and Robertson.

Blueberry Marketing Facility

The Edmonson-Metcalf County Industrial Authority was approved for \$51,000 (\$23,000 in state and \$28,000 in multi-county funds) to construct a regional marketing facility for blueberries to assist the efforts of the Kentucky Blueberry Growers Association.

County contributions to the project are as follows: Adair - \$2,000; Allen - \$5,000; Barren - \$5,000; Hart - \$5,000; and Metcalfe - \$11,000.

Building a Local Food Economy

Louisville/Jefferson County Metro Government was approved for \$120,000 in state funds for the continuation of the Louisville Farm to Table Program, which works to provide area farmers increased access to Louisville's consumer market.

Additionally, \$250,000 was approved to be transferred to the Kentucky Agricultural Finance Corporation to administer the Louisville Agribusiness Loan Program, which will provide low-interest capital to agribusinesses that process or add value to Kentucky grown or raised products in Louisville's Portland neighborhood.

Center for Sustainability of Farms and Families Initiatives

Kentucky State University was approved for \$998,000 in state funds over two years to implement the initiatives of the Kentucky Center for Sustainability of Farms and Families to foster development and improve

profitability of tobacco dependent small farms, as well as underserved and limited resource farmers within the Commonwealth.

Equine Economic Impact Survey

The Kentucky Horse Council Inc. was approved for \$300,000 in state funds to conduct a comprehensive equine survey about the impact the entire equine industry has on the Commonwealth.

Feral Hog Control

Nonprofit Dynamics Inc. was approved for \$24,641 in county and up to \$31,141 in state funds to establish a three-tiered pilot program to control the feral hog population in Obion Creek watershed.

Counties contributing to the project are as follows: Carlisle - \$5,000; Graves - \$10,000; and Hickman - \$9,641. The three tiers will be used to stop expansion and provide a substantial reduction in feral hog populations in the area.

Lamb Marketing

Four Hills Farm LLC was approved for a \$4,000 grant in Mercer County funds and a \$50,000 one percent (1%) interest loan in state funds to expand their lamb enterprise, which markets Kentucky raised lamb to restaurants and food service markets.

Livestock Sale Facility

Bluegrass Stockyards of Albany LLC was approved for \$30,000 in Clinton and \$5,000 in Wayne County funds for the construction of a 50,000-square-foot stockyard facility in Albany. The facility will provide a competitive, modern livestock auction market for farmers in south central Kentucky.

Meat Processing, Retail Distribution

The Wolfe County Fiscal Court was approved for up to \$350,000 in a combination of state and county funds to develop a USDA-approved meat processing facility and retail distributorship. Funds are for the facility's meat cooling system.

County contributions to the project are as follows: Breathitt - \$10,000; Elliott - \$4,289; Lawrence - \$2,500; Morgan - \$20,000; Perry - \$3,211; Rowan - \$10,000; and Wolfe - \$20,000.

Multi-County Large Animal Composting

W. Brent Woodrum was approved for \$22,500 in multi-county funds to purchase equipment and materials for a multi-county fallen animal composting service site in Casey County.

Saddlebred horses in Bourbon County

County contributions include the following: Adair - \$5,000; Casey - \$10,000; Marion - \$2,500; and Russell - \$5,000.

Regional Agri-Education Facility

The Fleming County Board of Education was approved for \$78,500 in county funds for a regional agriculture education facility in the Buffalo Trace area to provide hands-on experience for students.

Contributions were from the following counties: Bath - \$10,000; Bracken - \$1,000; Fleming - \$50,000; Lewis - \$5,000; Mason - \$10,000; and Menifee - \$2,500.

Sheep & Goat Development

The Kentucky Sheep and Goat Development Office Inc. was approved for \$40,000 in state funds to continue the services provided by the office to sheep and goat producers.

Value-Added Processing and Distribution

Grasshopper Distribution LLC was approved for a \$200,000 loan in state funds, as well as up to \$50,000 in state funds as a grant to be matched with county funds. These funds will be used to establish a value-added processing facility and for building improvements to meet growing consumer and institutional demand in the Louisville area for locally-grown produce.

Vineyard & Winery Technical Assistance

The Kentucky Vineyard Society Inc. was approved for \$515,000 in state funds over two years to provide technical assistance and education to Kentucky's vineyards and wineries.

Large/Food Animal Veterinary Loan			
Hancock, Karen	Scott	\$ 100,000.00	<i>Scott County Veterinary Clinic, Inc.</i> purchase and renovation of Scott County Veterinarian Clinic, Inc

Appendix D: Background

The Governor's Office of Agricultural Policy (GOAP) was established in 1998 to provide a direct link between the Governor of the Commonwealth and one of Kentucky's most important industries, agriculture. It provides administrative staff to several boards and represents Kentucky's interest as state and national policy is developed.

The Kentucky Agricultural Development Board and the Kentucky Agricultural Finance Corporation are two of the boards administered by the Governor's Office of Agricultural Policy, which is led by Executive Director Roger Thomas. Thomas was appointed by Gov. Steve Beshear in 2008. Thomas and GOAP staff are responsible for the daily operations related to these two boards and any of the Governor's agricultural initiatives.

Kentucky Agricultural Development Board

The Kentucky Agricultural Development Board (KADB) is chaired by Governor Steve Beshear and consists of five statutory members or their designees and 11 appointed members. Statutory members include the Governor, Commissioner of Agriculture, Economic Development Cabinet Secretary, head of the University of Kentucky Cooperative Extension Service and the president of Kentucky State University.

Appointed members are geographically distributed throughout the Commonwealth and are subject to confirmation by the General Assembly. Seven of the appointments represent active farmers of which at least four are from substantially tobacco-impacted counties and two have experience in agricultural diversification; the remaining four appointments represent the Kentucky Farm Bureau, the Kentucky Chamber of Commerce, an attorney with farm experience and an agricultural lender.

Kentucky Agricultural Finance Corporation

The Kentucky Agricultural Finance Corporation (KAFC) is chaired by the Commissioner of Agriculture and consists of an additional statutory member and 10 members appointed by the Governor.

Of the 10 private members appointed by the Governor, two may be officers from a commercial lending institution, one may be an officer from a farm credit association, one may be an agricultural economist, one shall be a tobacco farmer, one shall be a cash grain farmer, one shall be a livestock farmer, one shall be a dairy farmer, one shall be a horticultural farmer, and one shall be from the equine industry.

Photos: (top) KADB and KAFC members during joint meeting of both boards. (above) Both boards tour Reed's Orchard in Daviess County.

Note: The KADB is regulated by KRS 248.701 to 248.727 and 10 KAR 2:020; the KAFC is regulated by KRS 41.606, KRS 247.940 to 247.978, 202 KAR 9:010, 202 KAR 9:020.
